01 EDUCATION

University of California, San Diego **GPA 3.892 / 4.0** Expected May 2028

B.S. Mathematics-Computer Science
B.S. Economics
Minor: Interdisciplinary Computing and the Arts

02 EXPERIENCE

Bauhinia AI / AI Engineering Intern Jul 2026 - Present

- Co-developed Meme Island, an AI-agent game-production pipeline with human review and publishing.
- Built agent-harness infrastructure with versioned Workflow Packs, a local MCP server, and validation for generated game builds and artifacts.
- Iterated playable HTML5 templates, adding rule variation and resource trade-offs to support replayability.

Neijiang Tax Bureau / Software Development Intern Aug 2025

- Built and deployed a Flask / SQLAlchemy app for supply requests, approvals and IT tickets.

Neijiang Haohan Software / IT Operations Intern Aug 2025

- Deployed hospital-system patches, verified updates and resolved user-reported issues.

03 SELECTED PROJECTS

Z Squad **Solo Designer & Developer | Swift / SpriteKit** Mar 2026 - Present

Pre-orders open | Worldwide App Store launch: Dec 3, 2026 TestFlight Beta | Website | YouTube Trailer

- Own end-to-end production of an iOS squad-survival game: design, art, audio, code and tooling.
- Designed combat, scavenging and squad progression; built procedural cities, companion AI, local co-op and a browser editor for pixel art, sound and levels with Swift source export.
- Lead launch: App Store Connect, TestFlight, privacy pages, trailers, art, ad plans and Apple featuring pitches.
- Contacted **60+ gaming video creators** for promotion; manage official X, YouTube, TikTok, Reddit and Discord channels.

Escape the Horde **Designer & Developer | TypeScript / Three.js** Demo 2026 / Prototype

- Designed and built an asymmetric 2-3 player horror prototype: survivors escape a manor while an opponent commands and possesses a finite infected force.
- Implemented branching escape quests, stealth and sound-based counterplay, server-authoritative WebSocket multiplayer and AI-controlled survivors.

PartyBox **Game Design & Development | SwiftUI** Prototype

- Developed eight party-game modes for one shared iPhone, spanning writing, drawing, improv and voting, with bilingual content and a session-wide leaderboard.
- Designed turn-taking, hidden-information flows, voting and scoring to support fair, readable play across different group sizes.

Zombie Runner Published a Godot / GDScript runner using signals and state machines. itch.io

04 ADDITIONAL WORK & LEADERSHIP

Subscription Sentinel: Shipped an iOS subscription manager on the App Store with receipt scanning and alerts.
Director Murphy: Produced two AI comedy shorts, from scripts and storyboards to audio and editing.
President, UCSD Chinese Drama Club | Sep 2025 - Present
Theatre: Director, About Planet Twenty Three (school production); co-writer, Good Luck Design.

05 SKILLS

Design: Gameplay systems, quest design, encounter pacing, progression
Code: Swift, GDScript, TypeScript, Python, Java; C / C++ / Slang (foundations)
Engines & frameworks: SpriteKit, Godot, Three.js; Unreal Blueprints (foundations)
Tools: Git, Xcode, MCP, Remotion, ffmpeg; Cinema 4D (foundations)
